1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 to 10 and 14 to 15 are, drawn to an apparatus for producing an audio signal, classified in class 381, subclass 310.
  - II. Claim 13 is, drawn to a software product for producing an audio signal, classified in class 700, subclass 94.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because an apparatus for producing an audio signal can use any techniques for producing an audio signal. The subcombination has separate utility such as an apparatus for producing an audio signal of invention I can use any technique for producing an audio signal.
